

WHERE NATURE AND TECHNOLOGY MEET

- 1949 Petrogas founded.
- 1959 Slochteren gas field discovered in The Netherlands. Petrogas starts supplying gas treatment skids to the Dutch Gasunie.
- '70's Focus shifts to gas treatment, oil & gas and (petro)chemical projects worldwide.
- 2005 Own large workshop / construction facilities in Eindhoven (The Netherlands).
- 2009 Mourik starts participation in Petrogas (25%).
- 2013 Mourik expands its participation in Petrogas from 25% to 70%.
- 2015 BlueAlp is split off from Petrogas.
- 2017 Increased presence in renewable and chemical markets

Last count: 1152 projects

COMPLETED PROJECTS

Fuel Gas Conditioning

Ras Al Khair (Saudi Arabia), SEC

OIL & GAS - DOWNSTREAM

Fuel Gas Conditioning

Fos sur Mer (France), Alstom

OIL & GAS - DOWNSTREAM

Fuel Gas System

Kazan (Russia), General Electric

OIL & GAS - DOWNSTREAM

Fuel Oil System
Ras Al Khair (Saudi Arabia), SEC

OIL & GAS - DOWNSTREAM

Fuel Oil – Loading & Unloading

Ras Al Khair (Saudi Arabia), SEC

OIL & GAS - DOWNSTREAM

Fuel Oil – Metering Prover Loop

Ras Al Khair (Saudi Arabia), SEC

OIL & GAS - DOWNSTREAM

Gas Dehydration & Glycol Regeneration

Al Noor (Oman), PDO/Shell

OIL & GAS - UPSTREAM

Gas Dehydration & Glycol Regeneration

Jemgum (Germany), Wintershall & Gazprom

OIL & GAS - UPSTREAM

Nitrogen Dehydration & Glycol Regeneration

Zuidbroek (Netherlands), Gasunie

OIL & GAS - UPSTREAM

Sand Accumulator

Sakhalin (Russia), Exxon & Sulzer

OIL & GAS - UPSTREAM

High Pressure Test Loop

Arnhem (The Netherlands), ProLab

IN-LINE SEPARATION

Chemicals Tank Terminal
Meerkerk (The Netherlands), Eputan

PETRO(CHEMICAL)

Fertilizer (UAN) Transfer System

Terneuzen (The Netherlands), VLT

PETRO(CHEMICAL)

LPG Evaporation Plant

El Gaili (Sudan)

LIQUEFIED FUELS

LPG Handling Systems

Cape Limboh, Sea Tankers Group

LIQUEFIED FUELS

Edible Oil Plant
Botlek (The Netherlands), Wilmar

STORAGE TANK FARMS

Edible Oil Plant

Botlek (The Netherlands), Wilmar

TRUCK LOADING AREA

Plastic-to-Oil

For BlueAlp (sister-company of Petrogas)

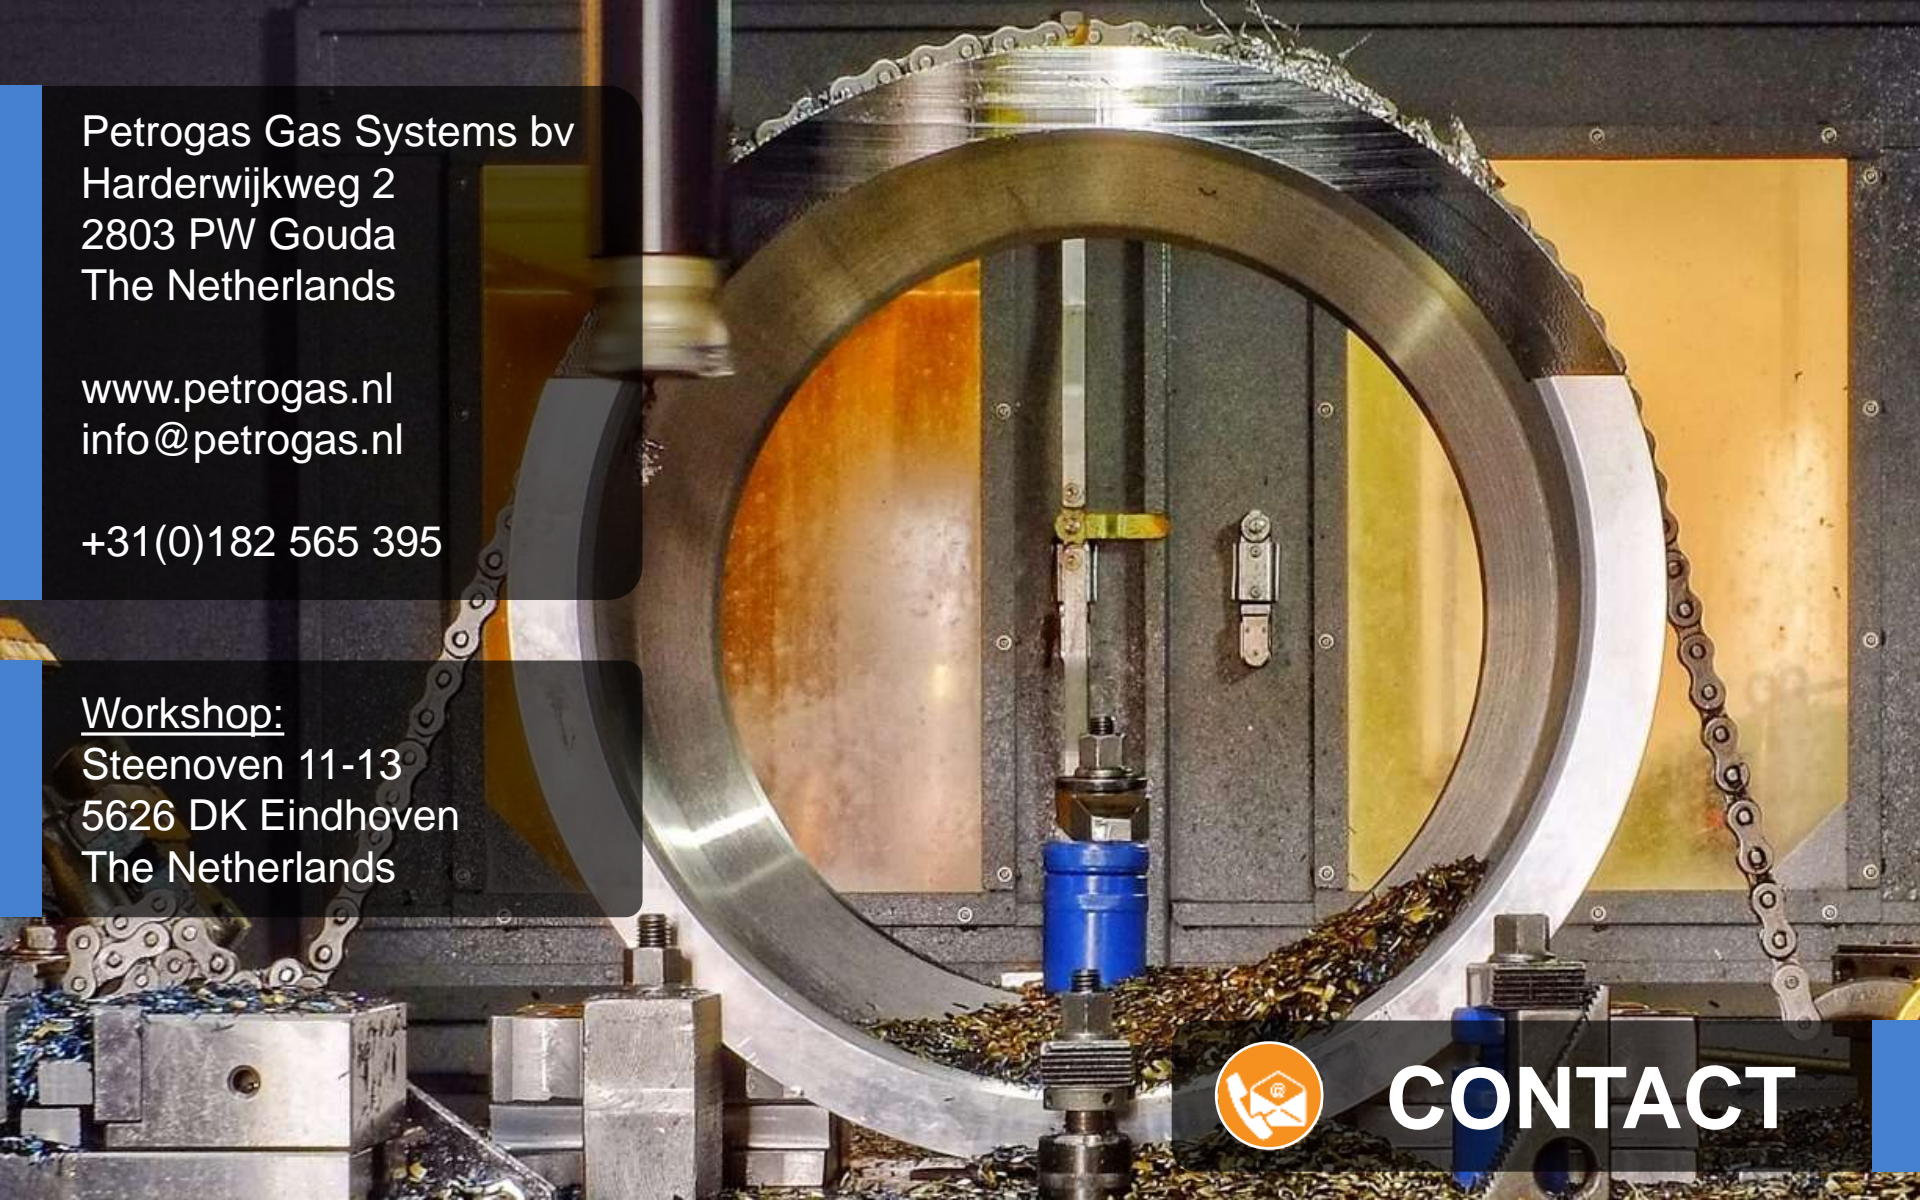

RENEWABLE ENERGY

Coming soon: Biomass Steam Reforming
Currently in testing phase with TU Delft

RENEWABLE ENERGY

A large industrial machine, possibly a circular saw or a grinding wheel, is shown in operation. A large, circular, metallic wheel is rotating, and a chain is visible around its perimeter. The machine is mounted on a sturdy metal frame. The background is a dark, industrial setting.
